Important: Coverage information provided by Digene Corporation (DIGE) is gathered from third-party sources and is presented for informational purposes only. Coverage for HPV testing varies by patient and is subject to contracting, deductibles, and payment caps. This information does not guarantee payment and DIGE makes no warranty regarding this information, its completeness, accuracy, or timeliness. Payer policies are complex and change frequently, and providers are responsible for all decisions relating to coding and reimbursement submissions. DIGE recommends that you consult your payers, reimbursement specialists and/or legal counsel regarding coding, coverage and reimbursement issues.

The Digene HPV Test* is FDA-approved for routine adjunctive screening with a Pap test for women aged 30 and older.

The appropriate CPT code for the Digene HPV Test is 87621. This code should be used in combination with the appropriate Pap test CPT code (either conventional or liquid-based).
